<b>REVISION:</b> 00

<b>SUBJECT:</b> Merlin IV External Menu	
<b>MODELS:</b> Merlin IV Venders 67100-5 Revision and Higher	
Kit Number	Kit Description

## INFORMATION:

The factory setting password for accessing the external menu in Merlin IV Venders with a 67100-5 Chip has changed from 4-2-3-1 to 1-3-2-4. The external menu allows you to access both total historical and individual selection can counts externally. You are also able to read Vender Errors externally (errors cannot be cleared externally). The "PAS" Mode gives you the option to change the external password to any of your select buttons in a four-digit combination. If you decide to set your own password and happen to forget it, just access the "PAS" menu and the current password will be displayed.

### Helpful Hints:

1. Password numbers range from 0 to 9
2. If your vender only has seven selections, you cannot use 8, 9, or 0 in your password or you will not be able to enter the password.
3. To disable the external password, set one of the 4 (four) digits to "0" or a selection that is not available (as described in hint #2).

### To Access the "PAS" Menu:

1. With the door open, push the service mode button
2. Scroll to "PASS" and push <enter>
3. Enter the password by pressing select buttons 4-2-3-1 (this password is non-changeable). Then press the <enter> button.
4. Scroll to the "PAS" Menu

### To Change the External Password:

1. Access the "PAS" Menu and press <enter>
2. The display will show the current password with the first digit flashing. Pressing <up> or <down> will change the flashing digit. Pressing <enter> will lock in any changes made to the first digit and now you are able to change the second digit. Follow this procedure for every digit.
3. If the fourth digit is flashing and you press <enter>, you will return to "PAS" and your new password will be set.
