PRODUCT NAME: 10 oz Juicy Juice

Figure 1.

Install the chute filler as shown (only required if vending this product from columns 1, 2, 7, or 8).

The chute filler is designed to close the gap between the edge of the product chute and the right cabinet wall. Without this chute filler, this product could bounce and become stuck in the gap, due to the small size of this bottle. The chute filler should be parallel to the bottom of the cabinet, approximately 6 3/8" (162 mm) from the cabinet floor. Secure it to the cabinet wall with the six screws provided in the kit (three on top, three on bottom).
