REVISION: 00

**SUBJECT:** Anti-static Harness Bag

# of People  
Required

**MODELS:** HVV

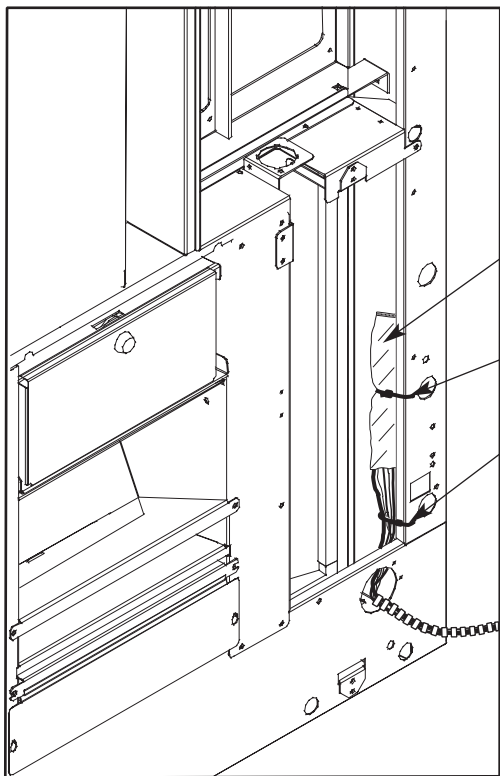

**TOOLS REQUIRED:** Snips

**ESTIMATED TIME:** 3 minutes

**REASON FOR HINT:** Beginning with serial number 200324FA00001, an anti-static bag is used to cover the wiring connections at the bottom of the HVV's main door. The purpose of this bag is to protect the harnessing from moisture. It is very important to replace this bag if it has been removed for any reason.

### REMOVAL AND REINSTALLATION INSTRUCTIONS:

1. Remove power from vender by unplugging the vender's main power cord from the AC voltage power source.
2. Using snips, remove the two wiring ties which secure the main harnessing and the bag to the main door. Remove the bag by lifting it up over the harnessing.
3. After reinstalling the bag, secure it with a wiring tie. Also, secure the harnessing below the bag with a wiring tie.
4. Restore power to the vender by plugging the vender's main power cord into the AC voltage power source.

Anti-static Bag

*The anti-static bag is available for order from Royal Vendors, Inc.*

Wiring Ties

*The following areas of this vender contain voltage which can cause serious injury or even death: the main power cord, supplying 110 VAC to the evaporator, EMI filter, and refrigeration system; the power line from the EMI filter to the ballast and transformer; and the ballast, which can produce upwards of 600 volts. Remove power from vender before working in any of these areas.*
