SUBJECT: New Controller Service Mode Button

MODELS: All current-production venders

Number of People Required **N/A**

KIT NUMBER **KIT DESCRIPTION**

N/A N/A

TOOLS REQUIRED: N/A

ESTIMATED INSTALLATION TIME: N/A

The following areas of this vender contain voltage which can cause serious injury or even death: the main power cord, supplying 115-230 VAC to the evaporator, EMI filter, and refrigeration system; the power line from the EMI filter to the ballast and transformer; and the ballast, which can produce upwards of 600 volts. Remove all power from the vender before working in any of these areas.

BACKGROUND INFORMATION:

The service mode buttons on the Coinco controllers have changed. Previously, from 2002 (KO controllers) or the mid-1990s (all other venders) until early 2010, the service mode button was a blue, round disk. The newer controllers have a blue or tan cylinder-style button. The function of the button has not changed, only its design.

Service mode button

Shown here is the tan cylinder-style button. Some boards may have a blue cylinder.

In an effort to provide our customers with the latest information on our equipment, Royal Vendors sends service bulletins to customers using the original ship-to address or e-mail addresses, if supplied by our customers. We also post all service bulletins on our website at www.royalvendors.com. If for any reason a vender is moved to another location or is sold to another customer other than to whom Royal Vendors originally sent the machine, it is the responsibility of the original purchaser of the vender to notify the appropriate personnel of the service bulletin.
