REVISION: 03

SUBJECT: Installation of Changer Jacket

MODELS: All Venders

KIT NUMBER	KIT DESCRIPTION
011182	Changer Jacket Kit

Instructions:

1. Unplug Vender. Remove changer from vender.
2. Remove the acceptor from the changer body.
3. Roll the tubed outlet on the changer jacket to its base. Insert the changer's plug into hole. Some stretching will be needed to get plug to clear the tubed outlet.
4. After the plug has cleared the outlet, slip jacket into place over the changer body. In the rear of the changer, locate the mounting holes that are covered by the jacket. Using a razor or any cutting instrument, cut an "X" over each hole. This will allow the changer to be mounted on the screws in the changer door without ripping the jacket.
5. Unroll the tubed outlet that is around the changer's cord. Twist the tubed outlet around the cord tightly and secure with a wire tie.
6. Mount changer in vender. Lift jacket and tighten the mounting screws. Roll the part of the jacket that is on the changer body upwards. Reinsert the acceptor back into the changer body.
7. Unroll jacket back down onto the changer so that it is snug. Make sure the plunger is covered by the projection provided in the changer jacket.
8. At the coin inlet of acceptor, stretch the existing hole in jacket around coin inlet.
9. Use a dab of silicone grease or lubricant on the part of the jacket that is covering the changer plunger.

NOTE:

THIS PRODUCT IS MADE FROM NATURAL RUBBER FOR LONG LIFE. DO NOT USE A PETROLEUM BASED GREASE ON THIS PRODUCT.
