**SUBJECT:** Using the External M.I.S. Phone Jack for Merlin

**MODELS:** All Merlin 2000 with an external M.I.S. installed.

**KIT NUMBER**

**KIT DESCRIPTION**

*The following areas of this vender contain voltage, which can cause serious injury or even death. The main power cord, supplying 110 VAC to the evaporator, EMI filter, and refrigeration system. The power line from the EMI filter to the ballast and transformer. The ballast can produce upwards of 600 volts. Remove power from vender before working in any of these areas.*

**BEFORE WORKING ON VENDER:** Remove power from vender by unplugging vender's main power cord from the AC voltage power source (wall outlet).

## **Instructions:**

1. Locate the port on the front of the vender.
2. Installed into the top of the port (behind the port trim and in front of the anti-theft plate) will be the large phone jack with a miniature phone jack to one side of the larger phone jack.
3. Plug the male side of the large phone jack into the stalled phone jack position. Using the provided miniature male phone jack as a key, plug into the female miniature phone jack. This will simulate the effect of the main door being open. All information from the L.E.D. / Control Panel and the U.C.S. / D.E.X. will be available for access.

**NOTE:** This is available on venders with the external M.I.S. installed and with control boards 4.03, 5.07, 5.08, and 5.09.
